Portfolio: bhargavxx.netlify.app

SUMMARY

A highly motivated Frontend Developer and Computer Science undergraduate with a strong command of HTML, CSS, JavaScript, React, and Tailwind CSS (intermediate). Passionate about building intuitive and responsive web applications from the ground up. Proven ability to complete projects, as demonstrated by developing an AI idea platform and a QR code generator. An effective team player committed to writing clean code and delivering high-quality user experiences.

SKILLS

Languages: HTML, CSS, JavaScript (ES6+)   **Libraries & Frameworks:** React (intermediate)
Core Concepts: Responsive Design, API Fetching, Teamwork & Collaboration

PROJECTS

INNOV.AI - AI Startup Idea Platform   bhargavx23.github.io/INNOV.AI
- Developed a web platform to help users discover and generate innovative startup ideas using AI.
- Designed and implemented a clean, user-friendly interface to encourage exploration and ideation.

QR Code Generator   bhargavx23.github.io/qr
- Created a utility tool to convert any text input into a downloadable QR code image instantly.
- Integrated a third-party API to handle the QR code generation, gaining practical experience with API fetching and data handling in JavaScript.
